political systems, decision-makers are increasingly in need of strategic guidance grounded in solid and impartial expertise. To meet this urgent demand, IVADO, in collaboration with its partners, is launching an ambitious initiative: a series of policy statements designed to offer clear, actionable recommendations on the global challenges posed by AI.

## **An interdisciplinary collaboration for global insights**

a platform where globally recognized experts can collaborate and propose policy solutions to tackle pressing challenges.

"We strongly believe that open, interdisciplinary discussions among experts from diverse countries can lead to strategic recommendations with global applicability," says Catherine Régis.

## A first writing retreat in Rome

Each retreat will center around a specific theme, explored in depth through a comprehensive analytical dossier.

Participants will collaborate to build consensus and craft a compelling policy brief. These briefs are designed to shape global policy directions and will be translated into several languages to ensure they reach a broad international audience.

The first retreat was held in Rome from

practices for protecting the integrity of political information and elections in the face of malicious uses of AI.

The first policy statement resulting from this writing and reflection workshop will be published in early 2025.

*The first workshop in Rome was conducted in collaboration with the Canada CIFAR AI and Human Rights Chair, the University of Ottawa's Research Chair in Technology and*
